COSMETIC CASES — WHAT'S INCLUDED

Full smile design using photo import in exocad to plan the patient's smile relative to their facial anatomy and biology.
Smile planning, proportional analysis, and design carried through to finishing and ceramics by senior-level technicians.
Cosmetic pricing reflects the additional design time, technical expertise, and artistry required for anterior and full-smile cases.

FINAL ONLY VS PACKAGE

Final Only is the final prosthesis alone. **Package** pricing includes the Verification Jig, Lab Analogs, Ti-bases, Temp Cylinders, 3D Printed Try-in & Milled PMMA Temp.

Each package includes a complimentary 2nd try-in to verify any design changes for larger cosmetic or functional modifications before proceeding to final — added peace of mind for both doctor and lab.

All hybrid pricing includes up to 5 implants. $300 per additional implant site.

Package pricing: ½ due at try-in • ½ due upon completion

GINGIVA MATERIALS

All Thimble and Milled PMMA hybrids include pink composite gingiva.

All Zirconia hybrids include layered pink porcelain gingiva.

3D printed hybrids include light-cured stain and glaze — upgrade to composite available.

MUA (MULTI-UNIT ABUTMENT) HYBRIDS

MUA hybrids default to milling the MUA interface as part of the bridge rather than using cemented ti-bases. Please notify us if your case requires ti-bases.

All fixture-level implant cases will receive a ti-base, except for bars.
